## Looking for inspiration on which practice to submit?

Take a look at our booklet showcasing last year's most successful submissions:  
<http://renewables-grid.eu/publications/award-brochures>

---

## Visit our best practice database and browse through more than 100 examples.

RGI's best practice database contains all examples summarised in our European Grid Report as well as the best cases from previous award competitions.

They are just one quick search away and can help you:

- shape your vision of the practice you would like to submit
- tackle a challenge you are facing in an on-going grid project
- come up with new ideas for more effective cooperation, minimised environmental impacts or innovative technologies

The database gives you the opportunity to apply different filters and search functions to quickly find the information you need.

Visit <http://renewables-grid.eu/activities/best-practices/database> for more information and be inspired by best practice examples from all over Europe that will come in handy in your daily work!

AWARD

# GOOD PRACTICE OF THE YEAR

---

## Good Practice of the Year: 2016 Competition

"Honouring outstanding ideas in grid development"

*2015's winners – taking home the prizes for their outstanding practices:  
EirGrid, LIFE Elia-RTE and ESCSH*

*Impressions from the second award ceremony at the Théâtre de Vaudeville in Brussels: award jury members Marie Donnelly (DG Energy) and Baard Eilertsen (Truebase AB) (left), RGI CEO Antonella Battaglini hosting the ceremony (right)*

---

## Good Practice of the Year

Since 2014, the Renewables Grid Initiative has been awarding a prize for the “Good Practice of the Year” in grid development in three categories:

- Communication & Participation
- Technology & Design
- Environmental Protection

---

## What is the idea of the award?

The winning practice should be innovative and an improvement to the existing practices in its category. The award will hence honour a single exceptional practice, not an entire grid project. However, the minimum criterion for a submitted practice to be considered in this competition is a clear connection to a grid project that is needed for the integration of renewables.

---

## Who can apply?

European and non European grid operators, project developers, NGOs and public authorities engaged in grid projects are invited to send their submissions and let their most original and successful practice shine.

---

## The award ceremony will be hosted by the Energy Infrastructure Forum

If you are among the winners of this year's "Good Practice of the Year" competition, you will be honoured at the European Commission's 2nd annual Energy Infrastructure Forum in Copenhagen. The event will be attended by high level representatives of EU institutions, EU governments, network operators, industry and other relevant stakeholders.

---

## Find out more and download the submission form here:
